

QUESTIONS TO CONSIDER ASKING YOUR MEDICAL PROVIDER AFTER DIAGNOSIS

What is my specific diagnosis?

What are the causes and incidence of my condition?

Do I need any further work-up such as labs, imaging, or other tests to confirm my diagnosis?

Do you need to perform any endoscopic or invasive tests? If so, which one(s)?

Will any of these tests or imaging need to be repeated after I undergo treatment? How often?

What should I expect with this diagnosis? What other symptoms will I possibly experience from the condition or disorder?

What treatment options do I have?

Are there any activities I should avoid?

Will this impact my ability to work?

Can I still drive or travel?

Should my family members or I get tested for possible hereditary issues?

Can you tell me who I talk to about my financial or insurance concerns?
